## RESOTECH- BOD REFRIGERATOR

*Professional Manufacturer of Test Equipment*

**MAKE :- RESOTECH**

**MODEL NO. :- RESOTECH-WINSUN (TOUCH SCREEN PANEL WITH DATA LOAGGER)**

# **RESONANCE AUTOMATION AND MACHINES**

## **MANUFACTURERS & SUPPLERS**

SPECIAL PURPOSE MACHINE, MATERIAL TESTING MACHINE, LEAKAGE TESTING MACHINE, PACKAGING TESTING MACHINE, ENVIRONMENTAL TEST CHAMBER, ASSY. LINE EQUIPMENT, SOLUTION FOR ELECTRONIC AUTOMATION AND PRODUCT DEVELOPMENT, COMPUTERIZED CONTROL MACHINE , PLC HMI SCADA VISUAL BASIC SOFTWARE DEVELOPMENT SOLUTION AND OTHER SERVICES.

**BASIC**

The BASIC version has been designed for those customers who look for professional lab equipment at a very competitive price. The cooled incubators (ST) and refrigerators in the BASIC version feature aluminum interior and powder-coated sheet housing with a graphite front panel. This combination of construction materials maintains the quality of the equipment and guarantees an attractive price.

**COMFORT**

The COMFORT version is ideal for those customers who appreciate high quality products, reasonably priced. The inner chamber is made of smooth stainless steel-304/316 (to DIN 1.4016) being a great advantage. The external housing can either be constructed of a powder-coated sheet (RAL 7035) with a graphite front panel COMF, or polished stainless steel - COMF/S.

## PREMIUM

The PREMIUM version equipment is produced of highest quality materials, mechanically and chemically resistant. It features an acid-proof stainless steel-304/316 (to DIN 1.4301) interior. The external housing can either be constructed of a powder-coated sheet with a graphite front panel PREM, or polished stainless steel - PREM/S. Additionally, the ST units are equipped with class 2.0 temperature protection system to DIN 12880 to protect the samples.

## PREMIUM TOP+

The PREMIUM TOP+ version is comprised of all the features of the PREMIUM version with advanced programming possibilities. Constructed of an acid-proof stainless steel (to DIN 1.4301) interior and a powder-coated sheet (RAL 7035) with a graphite front panel PREM, or polished stainless steel - PREM/S housing, the equipment includes a large, full color **LCD touch screen**, Windows CE system and remote control via Ethernet. The temperature values can be displayed on the screen in a tabular or graphic form. There are also adjustable ramps and hold at set point times, individually for each program segment. The TOP+ version can store up to 20 user programs, each of up to 100 temperature-time segments. The Admin function allows to manage Users and set up access policy. Additionally, for ST units in standard, maximum temperature is +70°C. Moreover, the units in TOP+ version are equipped with temperature protection class 3.3 for ST and 3.2 for CHL to DIN 12880.

## Application

**BOD Incubator (Bio-Oxygen Demand)** are used to maintain temperature for test tissue culture growth, storage of bacterial cultures and incubation where high degree of constant temperature accuracy is required. Thermolab BOD Incubators provide accurate conditions and uniformity throughout the chamber.

- BOD determination microbiological research
- plant growing and microorganisms breeding at specified temperature
- Interior illumination
- Heavy-duty door hinges and latches to maintain a secure and uniform seal
- Racks & trays – Stainless Steel with adjustable height
- PLC based control system with 7" color touchscreen HMI.
- storage of liquids and samples for physicochemical analysis
- Cooled incubators (ST) can provide stable temperature conditions between.
- -40...+50°C regardless of ambient conditions (equipped with both heating and cooling systems)
- Inside Stainless Steel and Outside Mild Steel Powder Coated OR Stainless Steel
- Door Access Security system

Models BASIC, COMFORT, PREMIUM are equipped with a PID microprocessor controller with an LCD graphic display and illuminated touch buttons.

### Controller advantages

- Can be switched ON-OFF manually
- cyclic programs memory
- Proportional band
- Alarm on equipment Door remaining open for more then set time period
- SSR Drive voltage
- Rear panel digital input for process alarm (High/Low Deviation)& Event alarm (Door Open / Timer End)
- Digital input (Potential-free contacts) from Door switch
- Overview of set and current parameters while operating
- operating with temperature priority mode
- Cool Control. Switches ON-OFF Based on temperature PV & SP
- In Built Buzzer ( Beeper)
- Independent High/Low Deviation Process alarms
- Not suitable for use in corrosive or Explosive Atmospheres. The panel in switch the instrument is mounted must be free of Electrically conductive pollution
- Power fail Recovery ( Resume/ Reset/ Abort)
- Alarm alert on Door Opening for longer then set time
- Detailed description of parameters
- Defrosting function temperature sensor fail alarm
- Recording of min, average and max temperature value for each segment audible and visual temperature alarm
- In- built cold-junction compensation for thermocouples
- In built lead Resistance compensation for RTD ( Upto 22 Ohms in each lead)

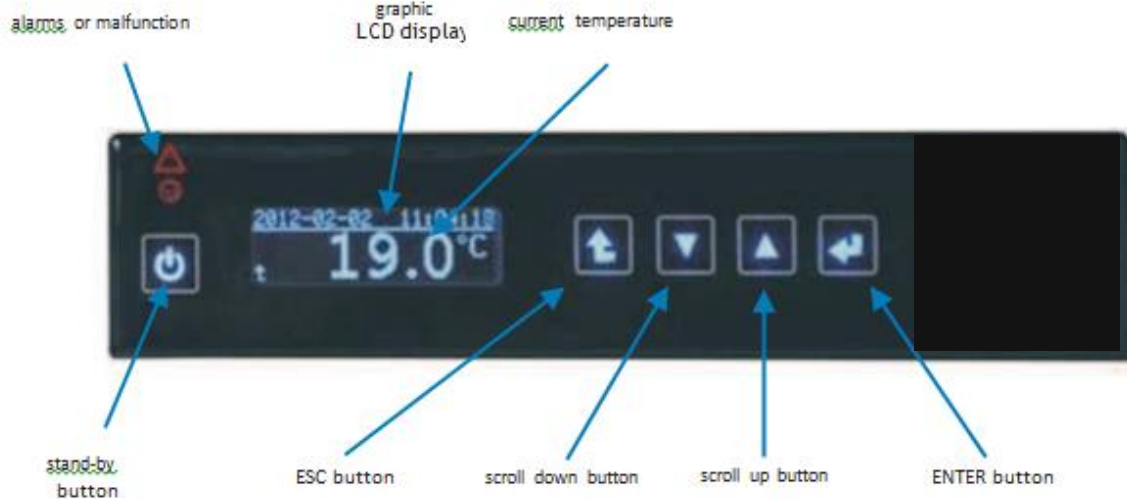

- parameter set by the User D - adjustable start delay (1 min...99:59 h)

- fan speed control (option)

T1/T2/T3 - temperature

CZAS 1/2/3 - time

## Control panel

## Standard features

- solid door
- temperature range -40...+50°C
- RS 232 and USB interface allow to download relevant program data with the free EasyLab Basic software available on the website or with the EasyLab Professional software (see page 68); cables to be ordered separately (RSK or USBK option)
- wire shelves for BASIC and stainless steel wire shelves for COMFORT and PREMIUM models quality control protocol
- English instruction manual
- available menu languages: Czech, English, Estonian, French, German, Italian, Latvian, Polish, Portuguese, Russian, Spanish, temperature protection 1.0 class for BASIC and COMFORT units and 2.0 for PREMIUM units to DIN 12880
- door lock
- wheels in standard for models ST 1200 and 1450
- open door alarm access port: Ø30 mm
- internal LED light

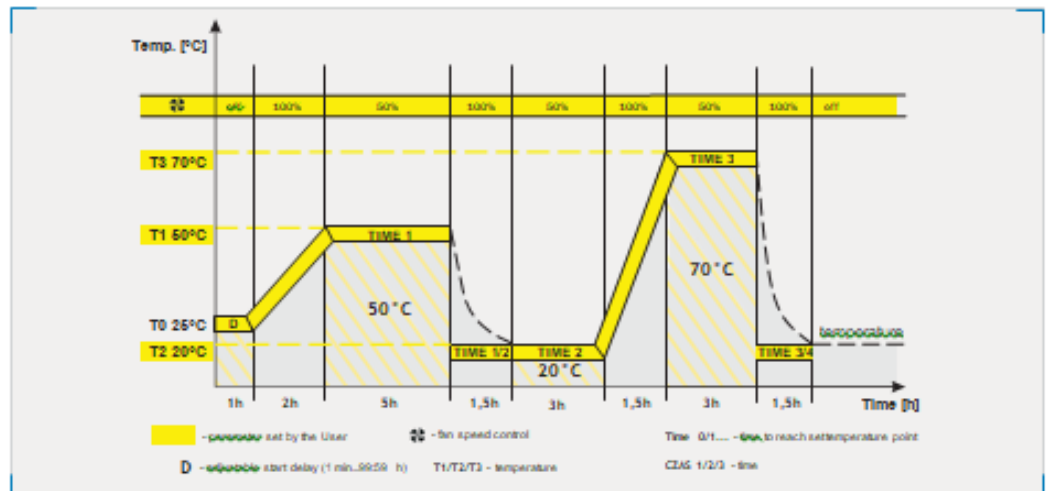

All the units in TOP+ version are equipped with PID microprocessor controller with a large (5,7") fullcolor touch screen, intuitive menu and user friendly software. They can be connected to Ethernet network for remote control from any computer, being one of the greatest advantages.

### Controller advantages

- Administrator function to manage User
- Accounts access control via login
- 7-days programming
- multi-segment temperature-time profile (up to 100) loop function up to 99 times or endless
- adjustable start delay feature (from 1 min to 99:59 h or date/time)
- 4 SSR Outputs: Heater control, Compressor control, Process Alarm & Event Alarm
- continuous operating adjustable ramps
- overview of set and current parameters while operating
- recording of min, average and max temperature value for each segment possibility of temperature calibration by the User audible and visual temperature alarm
- operating in temperature or time
- priority mode defrosting function
- temperature sensor fail alarm
- power failure control system (program continued after restoring power) digital timer
- real-time clock
- auto-diagnostic function
- forced air convection with fan speed control (50-100%)

### GLP supporting functions

- automatic fan shut-down after completing the program
- Password protected settings 20 user
- Internal memory to store up to 4100 data records for each User, possibility to overview the values on the display or a PC computer in tabular or graphic form USB port to allow direct data recording or transfer into a flash drive events registry
- programs memory

## Control panel

## Standard features

- solid door
- temperature range -40...+50°C
- RS 232 interface and USB port to allow direct recording and data transfer onto a flash drive;
- data can also be downloaded with the free TOP+ Control software (see page 69) or the cableTOP+ Control software
- wire stainless steel shelves
- quality control protocol
- English instruction manual
- available menu languages: English, Estonian, French, German, Hungarian, Italian, Latvian, Portuguese, Romanian, Russian, Spanish
- door lock
- open door alarm
- access port: Ø30
- internal LED light

door lock

RS 232 interface and LAN port

access port

internal LED light

## Options and accesories

■ BASIC
 ■ COMF
 ■ PREM
 ■ PREM TOP+

Thanks to the photoperiodic (FOT) and phytotron (FIT) systems the simulation of day and night is possible. The FOT option allows the lights to be turned on or off, while the FIT option additionally enables intensity control.

BASIC, COMFORT and PREMIUM versions of cooled incubators (ST) can be equipped with the FOT option, while PREMIUM TOP+ version (ST 500, 700, 1200, 1450) with the FIT system.

#### Program possibilities with FOT option:

- day and night simulation software to control light (on/off), time and temperature separately for each segment temperature range.
- simulation: -40 ... +50°C (when purchasing extended temperature range to +70°C) lamps installed on side walls
- fluorescent lamp 840 type (daylight) used as standard
- operating with time priority

#### Photoperiodic system (\* /FOT option) for single and double chamber cooled incubators (ST)\*\*

MODEL NO.	RESOTECH- WINSUN	RESOTECH- WINSUN	RESOTECH- WINSUN	RESOTECH- WINSUN	RESOTECH- WINSUN	RESOTECH- WINSUN
temperature range with photoperiod ON [°C]	-40... +50°C					
number of lamps on walls	2	4	6	8	10	15 (3 columns with 5 pieces)
adjustable illumination intensity	no	no	no	no	no	no
adjustable illumination intensity	no	no	no	no	no	no

\*\* for ST models with \* /FOT option, inner dims can be narrower by 4 cm on each side. FOT option is factory preinstalled. There is no possibility to order it separately.

## Cooled incubators (ST) with phytotron system

**PREMIUM TOP+ version of cooled incubators (ST 500, 700, 1200, 1450) can be equipped with the FIT system.**

### Program possibilities with FIT\* option

- day and night simulation software to control light intensity [%], time temperature and fan speed separately for each segment.
- temperature range for „night” simulation:
- simulation: -40... +50°C
- lamps installed in over-shelf panel (FIT P), side walls (FIT S), door (FIT D), door and side walls (FIT DS) fluorescent lamp 840 type (daylight) used as standard
- operating with temperature or time

### Phytotron system (\* /FIT option) for cooled incubators (ST) (PREMIUM TOP+)
